EXPERIENCE

Phreesia | *Software Engineer*

Nov 2022 - Oct 2024

- Built and maintained scalable **RESTful APIs** in **C#/.NET**, integrating external **EMR/EHR platforms** using **FHIR**, and **HL7 standards**.
- Modernized legacy **internal tools/features**, used by four major enterprise clients and improving system usability for **2,500+ practices**.
- Implemented comprehensive unit testing using **NUnit** and **Moq**, increasing code coverage to **92%** and reducing production defects.
- Monitored and analyzed integration logs using **Sumo Logic**, creating alerts to accelerate issue detection and resolution by **~40%**.

WestJet with UCalgary | *Lead Backend Developer*

Sept 2021 - May 2022

- Designed and developed a **flight recommendation system** and **flight history tracking service** using **JavaScript** and **Hapi.js**.
- Integrated the services with **WestJet's commercial APIs** and used **Vue** and **Storybook** to visualize **200+ data points** of the prototype.
- Increased customer booking engagement by **~20%** and improved personalized flight discovery since its deployment to production.
- Software engineering capstone project, sponsored by WestJet in partnership with the University of Calgary.

Chata.AI | *Backend Software Developer Intern*

May 2020 - Aug 2021

- Contributed across the full **software development lifecycle (SDLC)**, **design, implementation, testing, deployment, and troubleshooting**.
- Built and maintained a **greenfield AutoQL** demo application using **Java**, **Spring Boot**, and **PostgreSQL**, supporting business development and increasing customer acquisition by **~60%**.
- Designed and implemented **high-performance, scalable microservices** and **RESTful APIs** in **Python** and **Flask** to automate internal data and analytics pipelines, improving developer efficiency by **~30%**.
- Partnered with **front-end engineers** to integrate backend services, align API contracts, and accelerate service deployment.

TECHNICAL SKILLS

Languages	C#, Java, Python, JavaScript, TypeScript, Dart, C, C++
Backend	.NET, Node.js, Express.js, Hapi.js, Spring Boot, Flask, Axios, JUnit, NUnit, Moq, REST APIs
FrontEnd	React, Flutter, Vue, HTML, CSS, SASS
Databases	PostgreSQL, MySQL, MongoDB, Firebase

PROJECTS

Pulse New York - <https://www.chaseyourpulse.com/>

Tech Stack: **Wix**

- Designed and built the company's e-commerce platform, handling product catalog, checkout and order fulfillment.
- A small perfume business specializing in designer-inspired scents with the goal of making luxe brands more accessible and affordable.
- Co-founder and Technical Lead of startup business responsible for website, product packaging and distribution.

Personal Portfolio - <https://antondotio.github.io/>

Tech Stack: **HTML5, CSS, SASS**

- Built and maintain a personal portfolio website to document and demonstrate software engineering projects.
- Continuously iterate on design and content based on feedback and evolving technical skills

peachAt

Tech Stack: **JavaScript, Express, React, CSS, SASS, Socket.io**

- A messenger app where you can join, choose a nickname and color, and talk with friends. Responsive to both web and mobile medias.
- Uses JavaScript, Express and Socket.io in the back end to perform the logic and send messages to clients. The front end is written in React in a bright, peachy color scheme

EDUCATION

University of Calgary

Bachelor's of Science in Software Engineering
